

## Fluorescent Manipulator

The GreenEgg™ is a Patent Pending Class 1 medical device used for manipulation and visualization in Urologic, Gynecologic and Colorectal surgeries. The GreenEgg™ incorporates Tissue Reveal Technology™ that fluoresces under near infrared light to provide enhanced tissue feedback during minimally invasive surgery.

### Improves Anatomical Exposure

The GreenEgg manipulates the rectum and/or vagina for better anatomical exposure during surgery.

### Back Lights the Anatomy for Better Tissue Visualization

Backlighting tissue help surgeons improve imaging for better tissue visualization. By using the visible and NIR spectrum surgeons are using the full imaging capabilities of surgical robotic and laparoscopic imaging systems.

### Power Free Florescence

The GreenEgg fluoresces when energized by Imaging systems using Near Infra Red (NIR) cameras and illumination. This design enables the GreenEgg to provide full functionality without power cords or batteries.

### Easy to Use Design

The GreenEgg can be used by those that have experience with traditional manipulators, meaning that surgical flow is not interrupted.

### Disposable

Every GreenEgg is individually wrapped and sterilized, making the GreenEgg available on demand without worrying about sterilization schedules associated with re-usable devices.

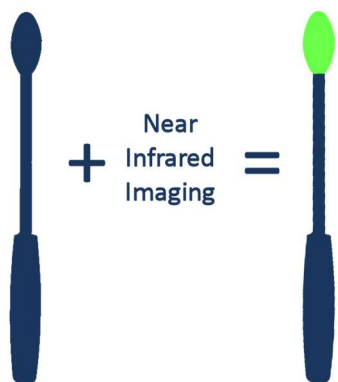

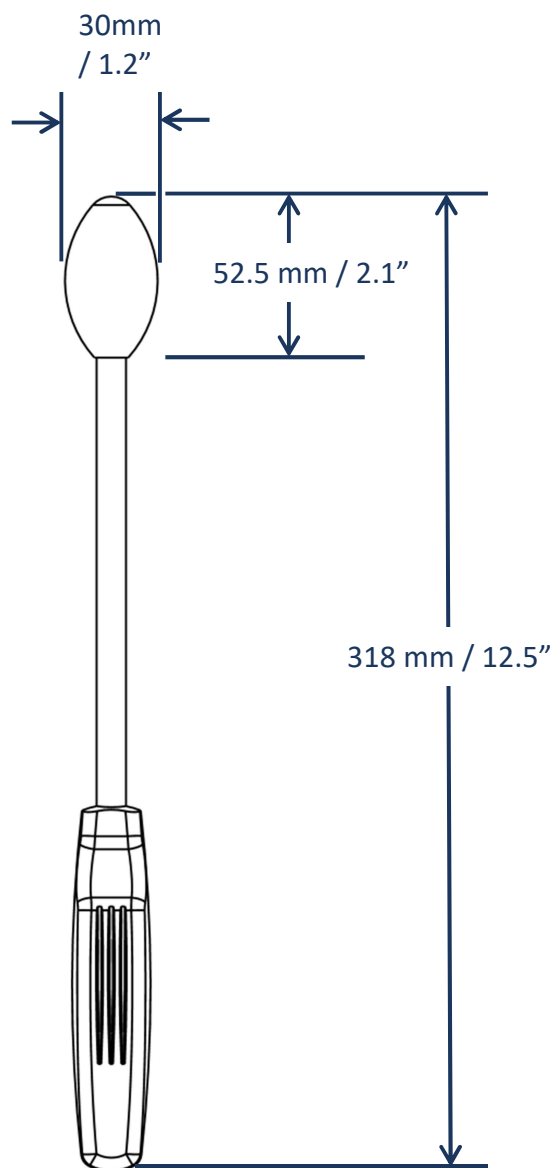

Batteries Not  
Required!

The GreenEgg™ utilizes EndoGlow's Tissue Reveal Technology, a provides fluorescence without the need for external power or batteries. This eliminates the need for cords or charging stations to provide hassle-free use and performance.

Contact EndoGlow to learn more or to schedule a demonstration.

## Product Specifications

Part Number	EP1000-30
Device ID / GTIN	0860001161601
Brand	GreenEgg™
Manufacturer	EndoGlow
Country of Origin	USA
Application	Vaginal / Anal Manipulator
Color	White
Illumination	Fluoresces Green when used with NIR systems*
Material	Stainless Steel & ABS
Size	30mm diameter 318mm length
Sterility	Sterilized in Package
Type	Manipulator
Power Requirements	None – the GreenEgg does not require batteries or external power
Usage	Disposable

### \*Use:

The GreenEgg can function as a standard vaginal or rectal manipulator during pelvic surgeries.

When used with robotic and laparoscopic systems that include Near Infrared Imaging (NIR) the GreenEgg will fluoresce.
